

Cyberon Corporation

Leading embedded speech solution provider

A pioneer in interactive speech technologies

Founded in year 2000 in Taipei, Cyberon is composed of a team from National Taiwan University's speech lab. Spotted the trend of device downsizing, Cyberon was focused on developing small footprint speech solutions. In 2008, Cyberon started to expand its solution coverage into the maturing cloud computing environment.

For more than a decade, Cyberon's technologies on IC have evolved from Speaker Dependent Voice Recognition (SDVR), Speaker Independent VR (SIVR), to Speaker Verification VR (SVVR), support 30 plus languages, and embedded in products of "Mobile & Wearable Device", "Car Kit", "Smart Home", "Interactive Toy", "Vehicle Navigator Speech Navigation" and other categories.
